

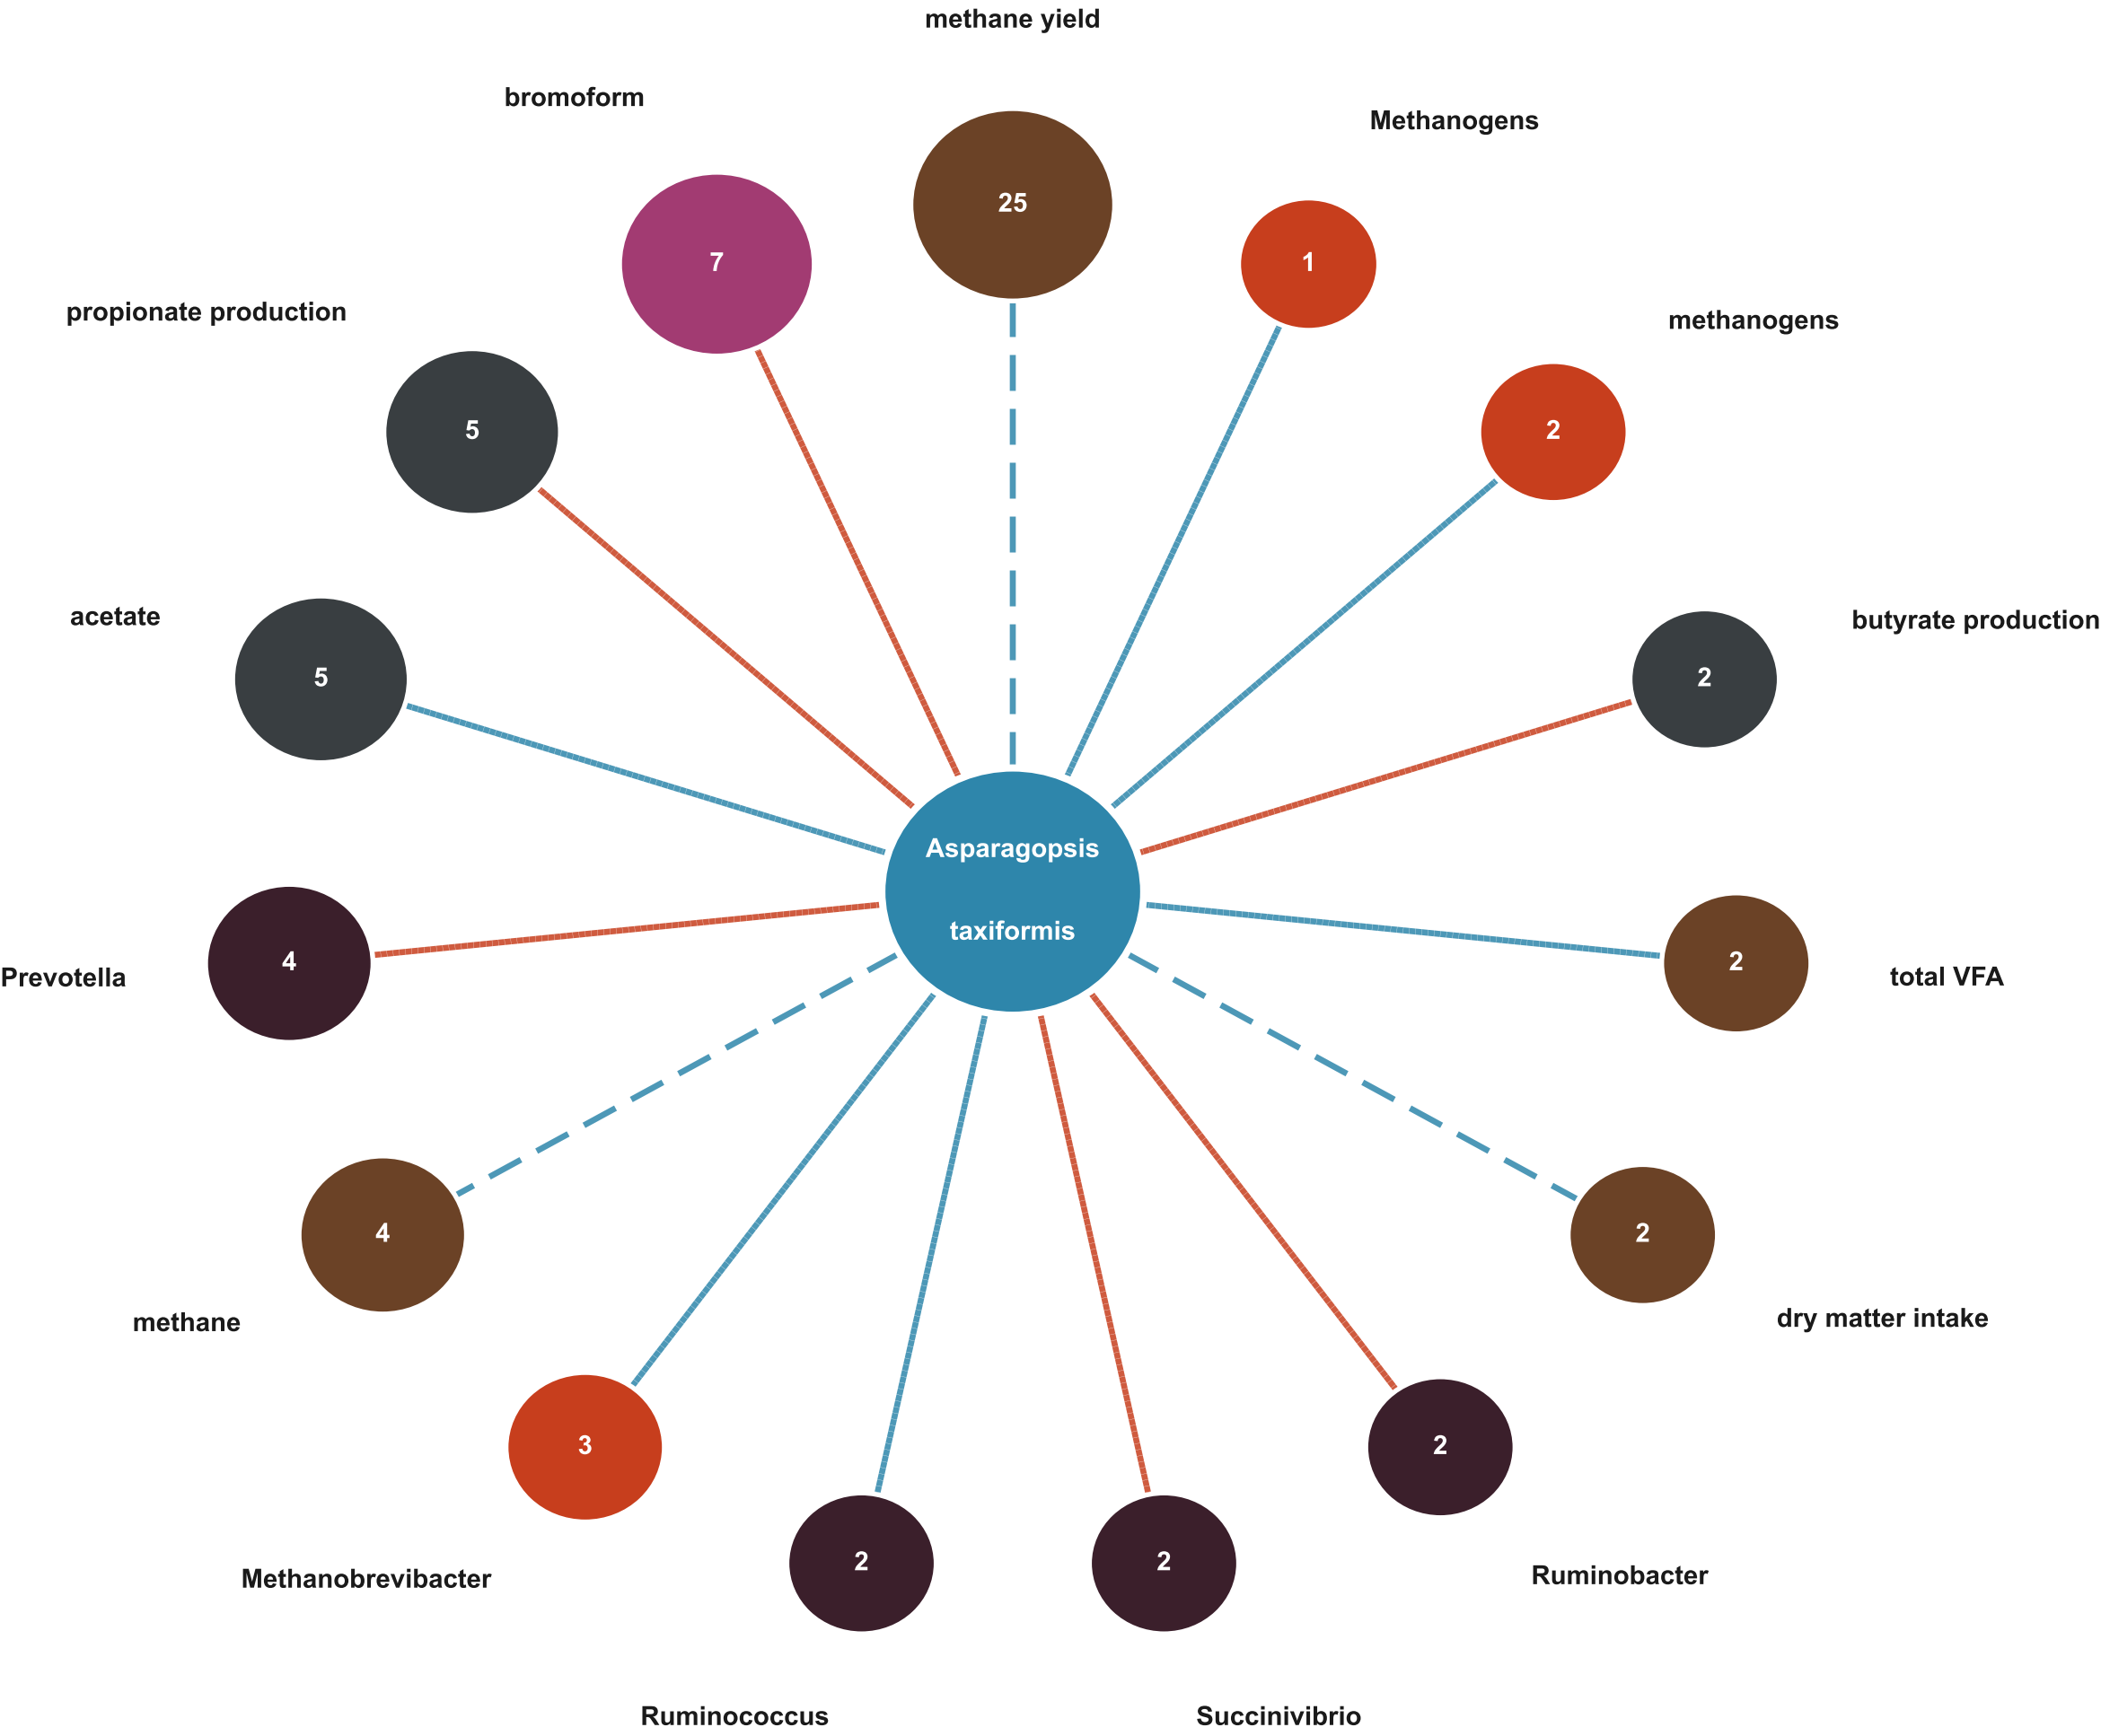

Figure 3.4 — Species-Level Evidence Subgraph: *Asparagopsis taxiformis*
Top 15 connected nodes | Node colour = entity type | Edge colour = effect direction | Dashed = inferred | Number = edge count

Legend — number inside node = edge count | Full network: kg_full_126corpus.graphml (supplementary)

Outcome	Rumen Bacteria	Effect: increase	Direct (measured)
Plant Metabolite	Rumen Archaea	Effect: no_change	Inferred
Metabolic Process	Effect: decrease	Effect: mixed
